What is an Electronic Bid Submission?

Electronic bid submission (EBS) is the electronic transfer of proposal bid data between a supplier and a contracting authority. The **bidnet direct** EBS feature allows suppliers to submit bids/proposals online via **bidnet direct**. The **bidnet direct** EBS feature includes safeguards to ensure the security and authenticity of the material being transferred. Vendors must be registered to at www.bidnetdirect.com/new-york/nyra to participate in EBS.

When do buyers at NYRA see my submission?

Submitted documents are stored in a secure fashion with a high level of security. All bids remain encrypted and not readable until bids are opened by the buyer and only after the closing date and time have passed.

What should I do before I submit a bid?

Carefully read the instructions within the solicitation. Refer to the required documentation and attachments that will need to be uploaded and submitted with your bid. Give yourself plenty of time when preparing to submit your bid through the **bidnet direct** portal just in case you run into difficulties.

Reminders before submitting a bid

Verify that you are a Follower of this Solicitation (if so, the top button will indicate that you are Following). You should be following a solicitation to be alerted of ANY addendum or communication issued regarding the solicitation (note that a change in registration type may be required to Follow).

Please review the addendum and communication tab for any information that may have already been issued and make certain to download existing documents and/or addendum.

You may have to click on Intent to Bid before submitting a formal Bid. This is an optional, but commonly used, request by buyers.

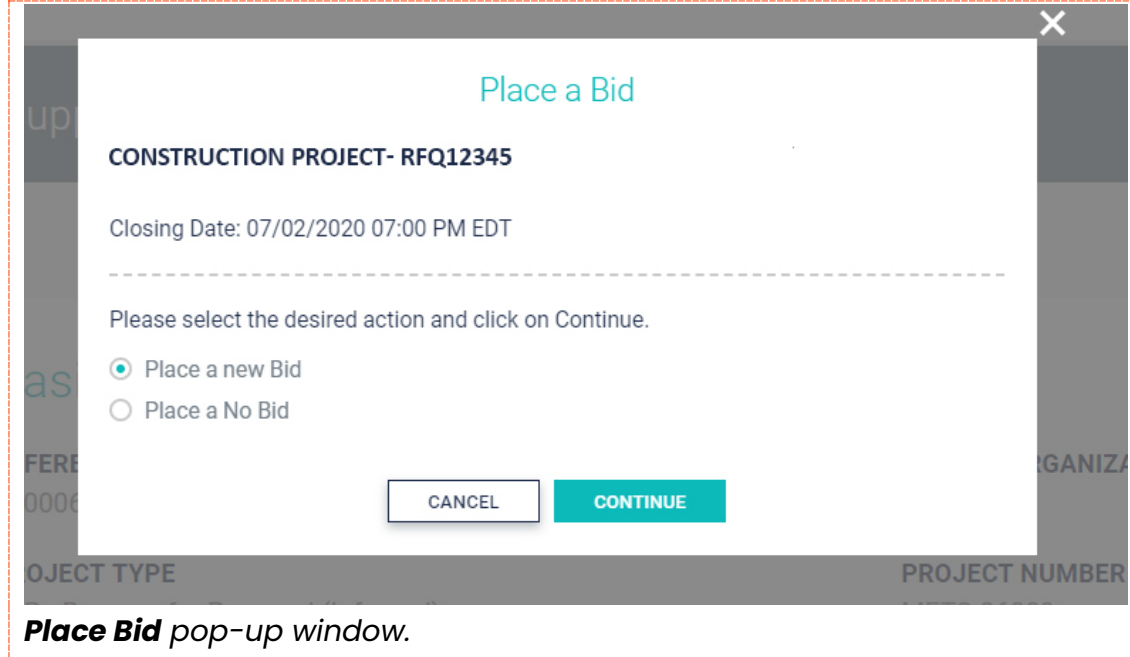

How do I place a new bid?

To submit a bid:

All vendors can place an electronic bid. Each bid response will be slightly different based on the agency's requirements. The online bid submission process will take you step-by-step through what is needed. This information should also be in the documents that you have already read outlining the requirements. Some solicitations will need only pricing, others need specific documents, etc.

The first step is to hit the PLACE BID.

The Place a Bid modal window appears. Select "Place a new Bid" and click on Continue.

Place Bid pop-up window.

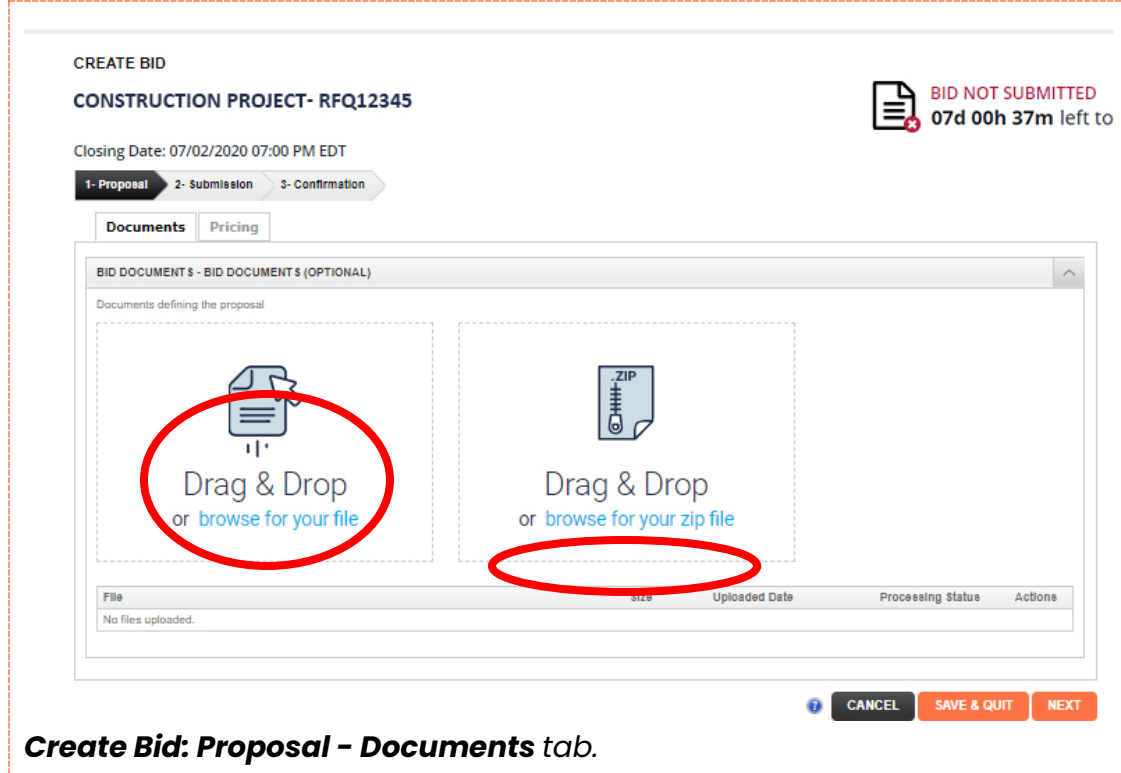

Creating a Bid typically takes place in three steps: the Proposal, the Submission, and the Confirmation. The steps will be outlined so that you understand when to upload documents, enter in pricing or an online response and/or upload a spreadsheet with pricing and items. A red “Bid Not Submitted” will show until your bid has been successfully submitted.

How do I attach my documents to submit?

You can either drag-and-drop or browse your computer for files to upload. To Browse for a file or set of files to upload, simply click on the link labeled “Browse for your file” and select the files from your computer.

Or, you can simply drag-and-drop the files one at a time in the Add File area or on the Add File button. If you have many documents in a compressed file, drag-and-drop the file in the Import ZIP File area or on the Import ZIP File button. The files will appear in the File section.

Once the files are uploaded, click on the next tab. This might be the Pricing tab or the Questions tab, depending on the type of Solicitation.

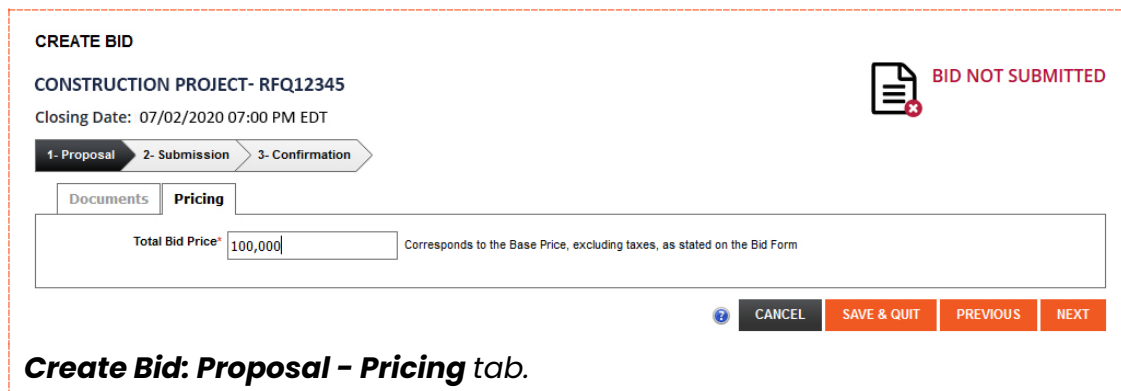

Create Bid: Proposal – Documents tab.

How do I add pricing information?

The Create Bid screen will walk you through what type, if any, pricing information is expected for you to fill in. Often, pricing is included as part of the required documents that you upload within your proposal. When prompted, fill out the information in either lump sum or line item bidding, depending on the fields that appear.

You can then click “Next” or, if you need to save it and come back, hit “Save and Quit”.

Create Bid: Proposal – Pricing tab.

What if I have to submit multiple line items?

If there are multiple line items, a template will appear that you can simply download the template, fill in your pricing and any comments and then upload the file.
